

Ławka jednorzędowa wykonana z profili stalowych zamkniętych, cynkowanych ogniowo 4szt. x 5miejsc (długość ok. 10mb łącznie) zgodnie z załączonym rysunkiem technicznym montowana na stopach fundamentowych 30x30x60cm

A 3D cutaway diagram of a cantilevered bench. Five blue plastic seats are mounted on a horizontal metal beam. The beam is supported by two vertical metal legs that are anchored into a concrete base. The concrete base is shown in cross-section, revealing the internal structure and the anchoring of the legs. The top surface of the concrete base is green, representing grass. The diagram illustrates how the bench is supported by a fixed base, characteristic of a cantilevered structure.
